ABOUT ME

My name is Tigran, I am 24, I'm looking for opportunities to work and develop in IT while gaining experience. I have not worked in any IT companies. The knowledge that I have for this 2 years was gained through self-study.

EXPERIENCE

Independent Projects

Dance
I designed one of the options for dance company websites using HTML, Gulp, Figma, CSS, SCSS, JavaScript.

- This project has given me an understanding of the HTML structure when developing a website.
- Understanding the correct way to add CSS code.
- Understanding what websites look like in code format.

GPT-3
For this example, I have used, React. CSS, HTML.

- Gained knowledge of how we can create an attractive website using CSS and React from simple concepts.

Personal Portfolio Website
For the portfolio, I used, React, CSS, React Router,

- In this project, I worked more with JavaScript and applied practical knowledge of JavaScript.
- Practically understood ReactRouter, and how use it. and it likes me, because it helps to combine pages.
- Compatibility of functions with each other.

SKILLS

I also gained some skills in Node.js and Express.js, though not very deeply. I made requests, extracted information from MongoDB and Postman, and sent it via localhost.
